

# MEDICAL GAS PIPELINE IDENTIFICATION TAPE

## DESCRIPTION

Precision UK Pipeline ID Tape is suitable for indentifying medical gas pipelines compliant to HTM 2022, HTM 02-01 NHS Health Technical Memorandum, C11 and BS 1710:1984. Colour banding should be applied near to valves, junctions, walls etc. A label every 3m should indentify each gas and arrow tape showing the flow direction of gas.

Gas types as shown below are 150mm wide x 33mtr

| Part No | Gas Type                     |
|---------|------------------------------|
| IDO2    | Oxygen                       |
| IDN2O   | Nitrous Oxide                |
| IDO2N2O | Oxygen 50%/Nitrous Oxide 50% |
| IDMA4   | Medical Air 4                |
| IDSA7   | Surgical Air 7               |
| IDVAC   | Vacuum                       |
| IDAGS   | Agss                         |
| IDEX    | Exhaust                      |
| IDARROW | Arrow (50mm x 33mtr)         |
